

What's New with RTS?

- Added Fandango Sales Report, Ticket Monitor, and Sales Monitor to Web Reporting.
- Updated tip reporting to include cash tips
- Added an option to add, remove and assign genres to films.
- Updated the showtime signs to support a varying range of auditoriums to display.
- Added the ability to search for items on the touch screen layout builder

For the complete list of updates and changes, check out our RTS website www.rts-solutions.com

[TradeShow Recap]

Thank you to all who visited with our sales team at the regional trade shows this past month. RTS traveled to conferences such as TONE, Mid Atlantic NATO, North Central NATO, and Show Canada.
Find out where we will be next.

Newsletter Tip

Did you know that you can hide films no longer needed in the film list? Navigate to

Actions - Schedule - Showtimes New Scheduler. Sort films by Newest. Click the first film you would like to hide. Hold down the shift key. Select the last film you would like to remove. This will highlight a block of films. Once selected, you can right click and hide films. The films will now be hidden from the list. Is a film hidden you're needing to schedule again? At the bottom of the list there is a checkbox to show hidden. The films will reappear and you can unhide the desired film. Please contact our technical support team if you have any questions.
